

ERRATA

Local Stability of Double-Coped Beams

Bo Dowswell and Robert Whyte

Vol. 51, No. 1, 2014

On page 48, Equations 25 and 26 should be revised to:

$$C_b = \left[3 + \ln \left(\frac{L_b}{d} \right) \right] \left(1 - \frac{d_{ct}}{d} \right) \geq 1.84 \quad (25)$$

$$C_b = \left(\frac{c_b}{c_t} \right) \left[3 + \ln \left(\frac{L_b}{d} \right) \right] \left(1 - \frac{d_{ct}}{d} \right) \geq 1.84 \quad (26)$$
