## Design and Construction of Lifting Beams

Paper by DAVID RICKER  
(4th Quarter, 1991)

Page 152, right hand column, end of second paragraph, the formula for allowable shear load should read as follows:

$$P_s = 2 (0.4) F_y e t$$

Page 149, right hand column, the formula for “short sling length” should read as follows:

$$L_1 = \sqrt{a^2 + H^2 - 2Ha(\sin \theta)}$$
